

Shadow Box Magnet

Step 1:

Decide on your background – you can use the precut round paper quote provided or use your own picture as a background. If you like to draw you could even draw a picture and use that as a background.

Tip: You can use the provided paper as a template to cut your picture to the correct size

Step 2:

Use a glue stick or tape to attach you background to the inside back of the metal tin

Step 3:

The kit contains two options to use as a filling – you can use either one or some combination of both the fillers provided.

Tip: The bags of filler are sized to be just the right amount – if you want to mix the fillers use just part of each bag.

Step 4:
Make sure the metal tin is sitting flat on a table then pour in your filler. Screw on the lid.

Step 5:
Peel the white paper backing off the magnets and stick the magnets to the back of the tin

Your project is complete!!
Happy Holidays!
Tip: You can use the brown paper bag that the project materials were packaged in as a gift bag.
